DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group IA, claim(s) 1-18 drawn to A production method for a display panel including a step of removing an uncured portion of the photocurable material layer having been exposed to light, thereby forming a plurality of microlenses.

Group IB, claim 27 that include claim 19, drawn to a method including a step of forming a microlens array by exposing a photocurable resin to light

Group II, claim(s) 19-26, drawn to an exposure apparatus including and an incident angle controlling mechanism for changing, in a gradual or stepwise manner.

The inventions listed as Groups IA, IB and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the group II invention can be made with different process or steps such a thermo-chemical and/or thermoelectric curing rather than photo-curing and, also the method of group IA, IB can be implemented on a display panel that the angle for controlling mechanism is continuous rather than stepwise as claimed in invention II. Thus, each of the above group inventions directed to an invention that is distinct, and requires a different search, than that of other inventions.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 2883

If applicant elects Group IA:

A) Applicant needs to elect the following species either of species A1 or A2 or A3

A1—claim 2) step (a) is a step of providing a display panel such that, among central wavelengths of any color light transmitted through the plurality of picture elements, a central wavelength of the first color light is the shortest wavelength.

A2-claim 5) Step (a) is a step of providing a display panel such that each of the plurality of pixels has the first picture element in a substantial center thereof.

A3-claim 6) step (a) is a step of providing a display panel such that the plurality of picture elements include a red picture element, a blue picture element, and a green picture element.

B) Applicant further need to elect the following species of either of species B1 or B2 or B3

B1-claim 4) step(c) comprises a step of at least partially curing, with light transmitted through the first picture element, the photocurable material layer corresponding to the plurality of picture elements included in each of the plurality of pixels

B2-claim 9) Step (c) comprises a step of performing exposure to substantially parallel light while varying an incident angle of the substantially parallel light with respect to the one principal face.

B3-claim 12) step (c) comprises a step of adjusting a light distribution.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 2883

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: stated above.

The following claim(s) are generic: claim 1 is generic for claims 1-18.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: as stated above each sub group has limitation(s) that is directed toward an invention that would require a different search that that of other group inventions and because each of the above inventions defining an invention that is distinct that that of the other and requiring a different search.

A telephone call was made to applicant on 10/15/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 2883

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kianni C. Kaveh whose telephone number is 571-272-2417. The examiner can normally be reached on 9:30-19:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on 571-272-2415. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
